REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reason for allowance.
2. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-27 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
3. The closest prior art Shwed et al (U.S. Pat. No. 5,835,726) which discloses a novel system for controlling the inbound and outbound data packet flow in a computer network. JP409146878 A, Gay, Rin Gasley et al discloses an inbound and outbound data processing system. However, neither Shwed nor Gay singularly or in combination discloses the recited feature:
4. As per claims 17, 31, 36 and 41 "a conduit file module, couple to said XML content configuration file module that receives files in a first XML format and generate corresponding files in a second XML format, and a persistent object framer (POF) module, coupled to said XML content configuration file module that maintains data persistence of files stored in a database external to said XDOC framework in said

electronic procurement system, wherein said files stored in said database correspond to said XML content in said in-bound documents and said out-bound documents respectively”.

5. Based on the specification the word “file module” is readable as a server, and therefore making it 101 ok.

EXAMINER'S AMENDMENT

6. Please amend claim 40 as follows:

Claim 40, line 1, delete “claim 31”, and add --claim 36--.

Authorized by Robert C. Kowert, Reg. No. 39,255.
